PROFESSIONAL SUMMARY

Data Engineer with 4+ years of expertise designing modern data lakehouses, robust ETL/ELT pipelines, and scalable distributed data architectures. Proficient in Apache Spark, PySpark, Airflow, Snowflake, SQL, and GCP BigQuery.

WORK EXPERIENCE

Senior Data Engineer | DataSphere Corp (2022 - Present)
- Architected petabyte-scale data pipelines using PySpark and Apache Spark on Databricks clusters.
- Orchestrated over 200 automated workflows and data quality checks using Apache Airflow.
- Migrated enterprise data warehouse from legacy SQL Server to Snowflake and Google Cloud BigQuery, cutting query costs by 35%.
- Modeled dimensional schemas (Star, Snowflake) and implemented streaming ETL with Kafka.

Data Pipeline Engineer | Insight Dynamics (2020 - 2022)
- Wrote optimized complex SQL transformations and stored procedures in PostgreSQL and BigQuery.
- Built automated data validation and ingestion frameworks using Python, Pandas, and Docker.

EDUCATION

Master of Science in Data Science, San Jose State University (2018 - 2020)
Bachelor of Technology in Computer Engineering (2014 - 2018)

TECHNICAL SKILLS

Python, SQL, Apache Spark, PySpark, Hadoop, Kafka, Airflow, Snowflake, BigQuery, Databricks, PostgreSQL, ETL, Docker, GCP, Git, Data Modeling
